# Convert Pursuit Race to TCF Race.

This assumes the Series is NOT set as a Pursuit Series, but rather each (pursuit) race is set to Pursuit on the Race Setup page i.e.

Steps

1. Process the race normally i.e. as a pursuit race. [This will store the offset time for each boat.]

2. Uncheck the Pursuit Race checkbox in TopYacht *Step 2 – Set-Up Race*.

3. Reprocess the Race. It should ask if you wish to use the offsets offset - click *yes.*

4. Verify that the results make sense for a non-pursuit race.

5. The handicaps will update sensibly for the next pursuit race.
