

# Convert Pursuit Race to TCF Race.

---

This assumes the Series is NOT set as a Pursuit Series, but rather each (pursuit) race is set to Pursuit on the Race Setup page i.e.

## Steps

1. First process the race normally i.e. as a pursuit race. [This stores the offset times for each boat.]
2. THEN turn it out of pursuit in *Step 2 – Set Up Race*.
3. Then reprocess. It should ask if you wish to use the offsets offset - say yes.
4. Check results make sense for a non-pursuit race.
5. The handicaps will update sensibly for the next pursuit race.
