

Move TopYacht to another Computer.

Prerequisites

The user must have administrator access rights to the new (target) computer.

On the Source (Original) Computer

- Use Windows File Explorer to copy the entire C:\Users\Public\Documents\TopYacht\ folder to a memory stick.

On the Target (New) Computer

- Open your web browser and navigate to <http://topyacht.com.au/web/downloads/>, then download the file 'TopYachtSetup.exe' then run it.
- Use Windows File Explorer to copy C:\Users\Public\Documents\TopYacht\ folder from the memory stick, and paste it into C:\Users\Public\Documents\¹ folder on the target computer. TopYacht will now operate on the files moved from the source computer.
- Set the region (and ensure the date format is DD/MM/YYYY)
- Set the clock to 24-hour
- Start TopYacht on the target computer. TopYacht will load the last used database the source computer accessed.
