

TopYacht: ~ Match Racing

Background

The scoring of Match Racing using TopYacht is limited to two boats.

The user must create a scoring system within TopYacht to suit the event.

A scoring system is not included in TopYacht because of its very infrequent use, and it can ONLY handle two boats in a series. A separate series is needed for each flight, and the use of race sessions if more than one race is conducted on the same race-track.

Scoring System Setup

This example creates a scoring system that complies with RRS C10.1.
