Cruising Series - (Non Spinnaker)		

Screen Overview:

Rating Certificates

Across the top of the table are several **Ratings** buttons. Clicking one will produce a downloadable list of the boats on the TES register with that particular rating certificate.

The list contains all the current rating data for that boat including the certificate number, its issue date and expiry dates.

TopYacht automatically updates these lists daily

Update Ratings

When a boat enters a series, TES applies the rating certificate values at the time the entry is completed.

Clicking the icon will apply any updates that have come into effect since the boat entered.

There is provision to amend these ratings values and apply individual Event Handicaps. Click on the for that rating / handicap system / series.

Any amendments remain within the series.

This screen also is used for allocating boats to various divisions, and labelling the divisions.
